

Gaceta de Economía invites every student, professor and researcher with interest in promoting high-quality economic research to submit relevant research documents.

## CALL FOR PAPERS

The objective of Gaceta de Economía is to promote high-quality economic research with an impact both inside and outside ITAM. The journal will accept original work on economic theory, applied economics, econometrics, development, political economy, economic history, finance and other topics as long as they are addressed with an economic perspective.

Every article will go through two rounds of peer review. If accepted, the author authorizes the publication and the use of the article in written, electronic or any other media and transfers the **non exclusive** patrimonial right of the article to Instituto Tecnológico Autónomo de México.

Submission instructions:

1. We accept articles in English and in Spanish only. To submit an article, a PDF copy of the article without any reference to the authors should be sent to the following address: [gaceco@itam.mx](mailto:gaceco@itam.mx).
2. If the article is selected for publication, the final version of the article must be sent in a TeX file compiled using the preamble specifically designed for Gaceta de Economía. This preamble will be sent to the authors of the accepted articles and can be also requested at any moment.
3. Citations must be identified by the author's last name followed by the year of publication between parenthesis. All references must be listed in the bibliography section at the end of the article.
4. It is suggested that the article does not exceed 40 pages with 1.5 line spacing.
5. Graphs and figures should not have borders or shadows of any kind. Titles of figures and tables should be left outside the image. Every figure and table should be numbered.
6. The editors appreciate that authors double-check their articles to avoid grammatical or orthographic errors as well as consistency problems with the references. This will minimize editorial changes and will expedite article revision and publication.
7. Articles must be submitted by January 29th, 2016 to be considered for the current number. Any article submitted later will be considered for the next number. All authors will receive a definite answer on publication no later than February 26th, 2016.

Sincerely,

The Board of Directors
